What is Agenda 21 Local?:

- It is a tool for the "strategic planning" of a municipality with the criteria of sustainability and participation .
- It is a "roadmap" for the short, medium and long term.

REQUIREMENTS:

- LEADERSHIP AND POLITICAL WILL (Belief in Democratic Participation).
- CONSTANT STIMULUS TO SOCIETY

OBJECTIVES: Local Strategic Plan (Local Action Plan).

- Society: Raising the levels of fairness and solidarity (participation).
- Economy: Promotion, development, productive diversification.
- Environment: Prudent management of the territory and its resources.

Benefits:

1) It publicises its performance.

2) It facilitates the management of the Municipality.

3) It raises awareness of any difficulties.

4) Participation legitimises "proceedings"

5) Disables social conflicts (co-operation).

6) Develops the social "filial-attachment" to the territory.

7) Innovation in management and local development.

In the end:"Things are not done because you feel like it..." - ”It favours a culture of consensus..."

Why now?

CALP signed the Aalborg Charter (European sustainable cities campaign). The whole agreement.

Near misses started without success (2001, 2003 and 2007).

3) Why didn't it work?

Current economic interests opposed to the philosophy of the project.

Lack of a culture of participation.

Problems of political instability.

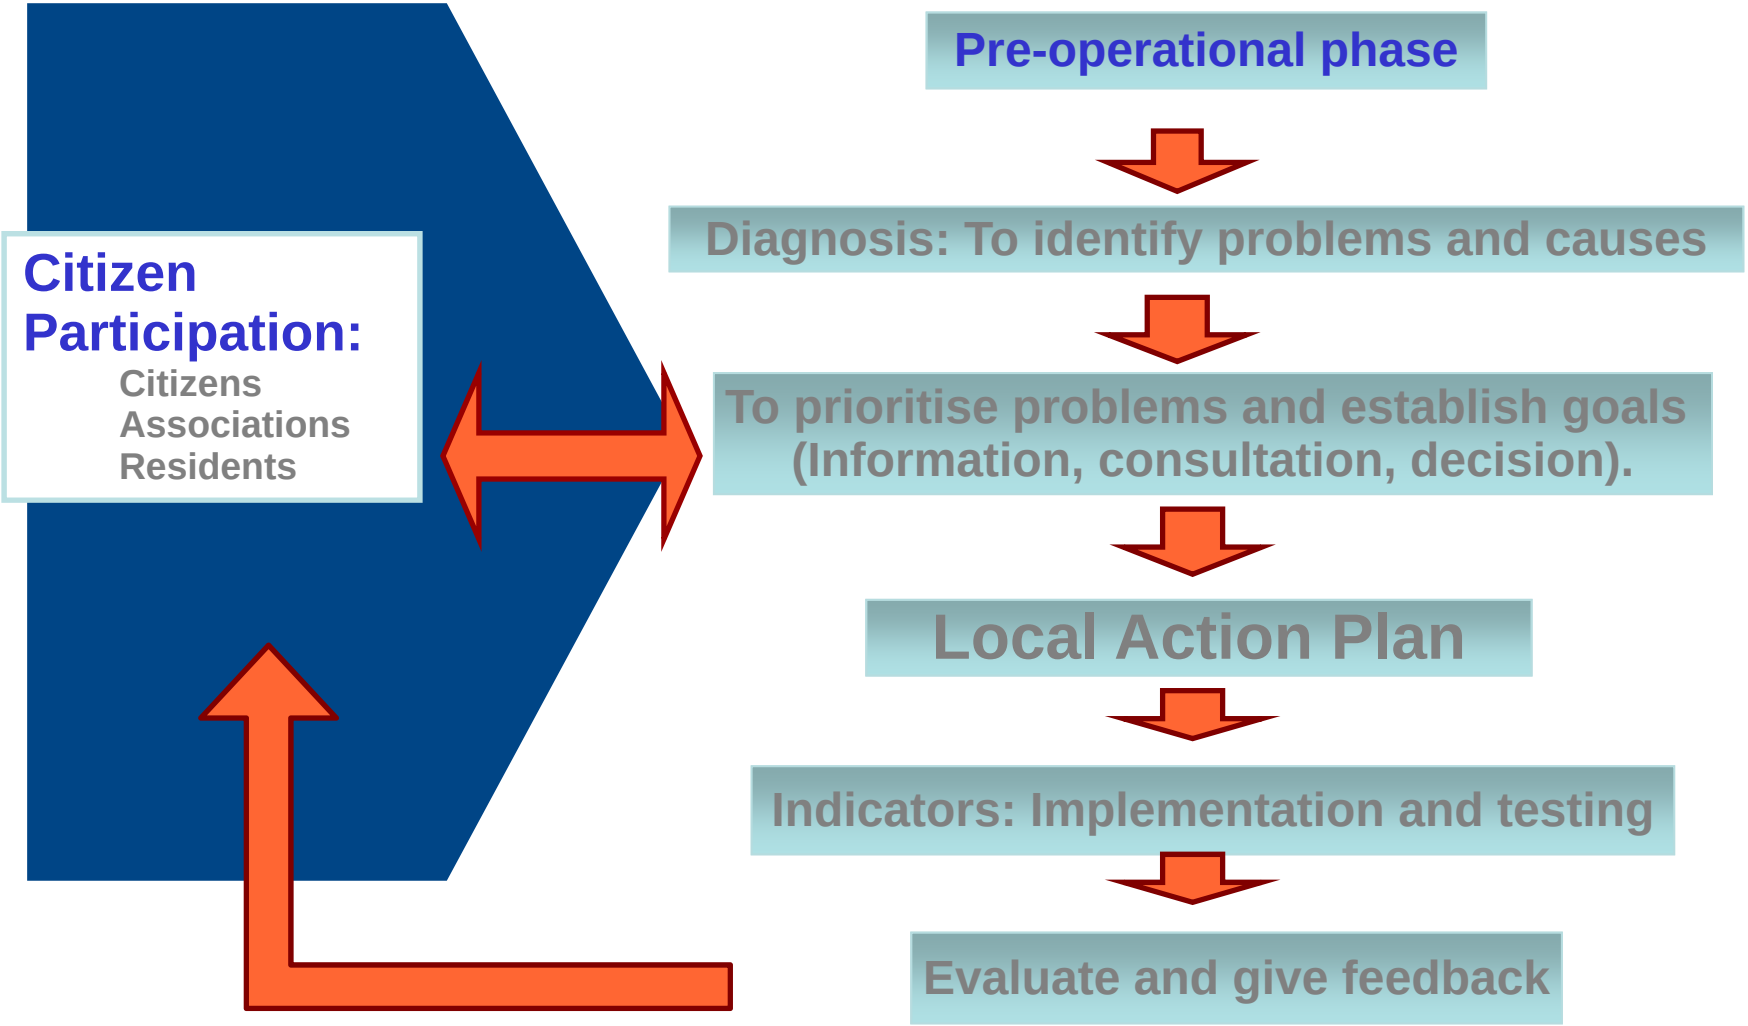
Lack of resources for its implementation.

Lack of training and adaptation of technicians.

Local complex and heterogeneous society.

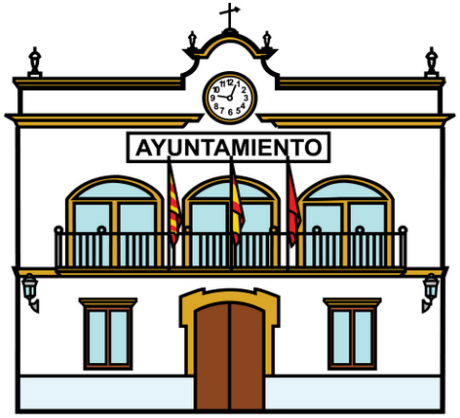
IT LACKED FOUNDATIONS

Phases of Implementation of the Project:



How do we want to develop the municipality from now on?

Situation of the municipality



Is brought to the Department a 21 (Townhall)

Facilitates the participation

Makes a decision/resolution

Phases of Implementation of the Project:

Local Action Plan

1. Natural Environment
2. Urban environment
3. Waste Management
4. Integrated Water Cycle
5. Noise Pollution
6. Energy flows
7. Economic environment
8. (Tourism, fisheries, trade, tertiary industry…)
8. Culture, education and knowledge
9. Citizen Participation
10. The municipal public management

Sustainability and quality of life:

"Calp 2020"

Possible results:

Local Action Plan

1. Natural Environment
   Preservation of Green Belts (ETCV)
2. Urban Environment
   Agreement on the Town Plan and its infrastructure
3. Waste Management
   Promotion of the 3 Rs??????????????????????????
4. Integrated Water Cycle
   Water Saving Plan and other measures
5. Noise Contamination
   Application of ZAS (Zones of Acoustic Saturation) and other measures
6. Energy flows
   Energy Saving Plan and other measures
7. Economic environment
   Industrial Estate, sustainable quality tourism (Consortium Calpe Tourism), fishing, trade.
8. Culture, Education and Knowledge
   Cultural and Sports Management, Municipal Culture Council???????? "A21 School", training, innovation…
9. Citizen's Participation
   Meetings and established contacts. Actions of solidarity, youth and voluntary workers…
10. Municipal governance
    Participating in the Budget, buying green, efficiency, interdepartmental communication, leadership in the procedure.

AGENDA 21 LOCAL
